---

SKILLS

Languages: Javascript, Python, HTML, CSS, SQL
Frameworks/Tools: React, Redux, Express, Flask, Sequelize, SQLAlchemy, PostgreSQL

PROJECTS

Social Reader   (React / Redux / Flask / SQLAlchemy)   live | GitHub
Social Reader is a web application for users to join book clubs and track reading lists.
- Programmed a functional clone of bookclubs.com.
- Developed an intuitive user interface
- Interpreted an existing application to build a personal project

YSTE   (React / Redux / Flask / SQLAlchemy)   live | GitHub
YSTE is a clone of Etsy, giving users the ability to browse products, review products, become sellers, and add products to their carts.
- Managed preparation and organization of wireframes and database schema.
- Implemented spotlight images by having a dispatch fetch a random list of products upon render.
- Utilized CSS, HTML, and React to create a user friendly navbar and splash page.

BnB   (React / Redux / Express / PostgreSQL / Sequelize)   live | GitHub
BnB is a clone of AirBnB, allowing users to view or create spots and reviews, along with simulating bookings.
- Ensured quality user experience by creating a streamlined user interface
- Built a functioning application utilizing Express and React
- Organized a timely schedule to keep an efficient workflow
